### CITATION

U.S. Census Bureau, American Community Survey 2008 Summary File: Technical Documentation.

### SPECIAL NOTES

- 1) Details on changes in the detailed tables and derived products since the 2006 ACS, including new products is available on the ACS Website at:  
<http://www.census.gov/acs/www/Products/2008/prodchanges.html>
- 2) Changes to the 2008 detailed tables which contain complete lists of new, removed, and modified tables can be referenced on the ACS Website on:  
[http://www.census.gov/acs/www/Downloads/Table\\_Changes2008.xls](http://www.census.gov/acs/www/Downloads/Table_Changes2008.xls)
- 3) Because of added/dropped tables, changes were made to some of the tables in the sequences. Sequences 51 and 146 contain geo-restricted tables, so there are many missing tables in these sequences. Sequences 125-133 contain 3 new large median tables (these tables contain 499 cells). Due to the size restriction on the sequences (no more than 245 cells), each of the tables was broken into 3 sequences. For example, sequence 125 contains B24121 cells 1-167, sequence 126 contains B24121 cells 168-333, and sequence 127 contains B24121 cells 334-499. For more details, see Chapter 5 and review the file  
[http://www2.census.gov/acs2008\\_1yr/summaryfile/merge\\_5\\_6\\_final.xls](http://www2.census.gov/acs2008_1yr/summaryfile/merge_5_6_final.xls)
- 4) ACS 2008 detailed tables that were subject to geographic restrictions are located on:  
[http://www.census.gov/acs/www/Products/users\\_guide/ACS2008\\_Data\\_Product\\_Geographic\\_Restriction.xls](http://www.census.gov/acs/www/Products/users_guide/ACS2008_Data_Product_Geographic_Restriction.xls)

- 5) Each set of ACS Summary file Technical Documentation is tied to a specific ACS year. Currently we have five sets of ACS Summary file, 2005 (prototype), 2006 (prototype), 2006 (production), 2008 (production), and 2008 (production.).
- 6) The ACS 2006 and ACS 2007 Production Summary files were created using the same file naming convention based on user input. For more details reference Chapter 1 of the technical documentation, section 3.3: File Identification.

## **NOTES ON UPDATES TO THE TECHNICAL DOCUMENT SINCE 2008**

### **Updated Chapters**

- **Chapter 1 Abstract** – Updates were made to all of the Special Notes and the number of tables, added the 2008 summary file link:  
[http://www2.census.gov/acs2008\\_1yr/summaryfile/](http://www2.census.gov/acs2008_1yr/summaryfile/).
- **Chapter 2 How to Use the ACS Summary file** - Updates were made to links.
- **Chapter 5 List of Detailed Tables** - Updated chapter 5 file link to  
[http://www2.census.gov/acs2008\\_1yr/summaryfile/merge\\_5\\_6\\_final.xls](http://www2.census.gov/acs2008_1yr/summaryfile/merge_5_6_final.xls)

### **Updated Appendices**

- **Appendix D Questionnaire** - links to the ACS questionnaire on the website were updated to include the most recent questionnaire.
- **Appendix E Data Products and User Assistance** - Data Products and User Assistance section links and document sources were updated.
- **Appendix G Code Lists** – Removed code lists for 2007 and added code lists for 2008.
- **Appendix I Sample SAS Programs** – Updates were made to the sample SAS programs, added additional sample programs, updated links, and modified SASReadme.
- **Appendix J User Notes** - Updates were made to the user notes and to links.

## **TYPE OF FILE**

Summary statistics.

## **SUBJECT CONTENT**

The American Community Survey (ACS) is the largest household survey in the United States, with an annual sample size of about 3 million addresses. Every year the ACS supports the release of single-year estimates for geographic areas with populations of 65,000 or more.

This release of the American Community Survey Production Summary file (ACS-SF) contains the 2008 detailed tables (a.k.a. “base tables”). Please send any comments you

have via email to: [nicholas.m.spanos@census.gov](mailto:nicholas.m.spanos@census.gov). We will keep users aware of any updates via the [ACS Alert](#) from the ACS website.

The 2006, 2008, and 2008 data products include the Group Quarters (GQ) population. The GQ population includes all people not living in households. ACS data were collected from residents who were currently residing in the GQs when the ACS was conducted at that location. Data are collected at two types of group quarters: institutional, including residences such as correctional facilities, nursing homes, and psychiatric hospitals; and non-institutional, which include residences such as college dormitories, military barracks, group homes, and shelters.

Every table that should be a “total population” table will include the GQ population. But, tables describing household characteristics will not include GQ data. For example, tables such as Median Household Income, will only have data from the population living in households.

The ACS-SF contains sample data, which is information about the characteristics of local communities compiled from the questions asked of a sample of people and housing units. The ACS covers a broad spectrum of geographic areas in the United States and Puerto Rico. The topics listed below are covered by the ACS and focus on demographic, social, housing, and economic characteristics.

Demographic:

o Sex	o Age
o Households by type	o Race
o Relationship	o Hispanic origin

Social:

o School enrollment	o Educational attainment
o Fertility	o Residence one year ago
o Veteran status	o Disability status
o U.S. citizenship status	o Language spoken at home
o Martial status	o Place of birth
o Year of entry	o Ancestry
o Grandparents caring for children	o World region of birth of foreign born

Economic:

o Employment status	o Commuting to work
o Class of worker	o Income and benefits
o Industry	o Occupation
o Poverty status	

Housing:

○ Housing occupancy	○ Housing tenure
○ Units in structure	○ Year structure built
○ Number of rooms	○ Number of bedrooms
○ House heating fuel	○ Housing value
○ Occupants per room	○ Vehicles available
○ Mortgage status and costs	○ Utility cost
○ Year householder moved into unit	○ Gross rent

The Census Bureau uses the data collected by the ACS to create estimates and variances, which are termed statistics, for these characteristics. The statistics produced from the ACS describe the characteristics of population and housing in the United States and Puerto Rico. The ACS releases statistics in several forms – totals, proportions, percentages, means, medians, averages, and ratios. There are three sets of data files in identical format with one field per estimate. One file contains the estimates, the second file contains the standard errors, and the third file contains the margin of error.

The ACS-SF contains a total of 1374 unique detailed tables. Of these tables, ID's beginning with the letter "C" are collapsed versions of tables (i.e. these tables have fewer detailed cells). These detailed tables include both U.S. and Puerto Rico population and housing characteristics for the housing unit population and for a limited list of race and Hispanic or Latino groups. Population and housing items may be cross tabulated. Selected aggregates and medians are also provided. A complete listing of subjects in this file is found in the section, "[Subject Locator](#)".

## **GEOGRAPHIC CONTENT**

The ACS Production Summary file includes all detailed tables for all geographic areas published by the 2008 ACS. The main directory of the ACS-Summary File's FTP server ([http://www2.census.gov/acs2008\\_1yr/summaryfile/](http://www2.census.gov/acs2008_1yr/summaryfile/)) contains documentation on using the ACS-SF and 53 subdirectories, for the United States, the 50 states, the District of Columbia, and Puerto Rico. The file structures are identical for all files, but the geographic coverage differs.

This abstract lists the most frequently accessed geographic levels. The "Summary Level Sequence Chart" section outlines the hierarchical and inventory geographic summaries in their entirety. Two summary level sequence charts are provided: one for the state files and one for the final national file.

### **State Files**

ACS-SF for states also has inventory (complete) summaries for the following geographic areas:

- State
- County

- County subdivision
- Place
- Congressional district (110<sup>th</sup> Congress)
- Public Use Microdata Area (PUMA)
- School Districts
- Alaska Native Regional Corporation

### **National Files**

The ACS-SF national file provides summary data for the entire United States. The file structure includes, but is not limited to, the following geographic entities:

- United States
- Region
- Division
- State
- County
- County subdivision
- Place
- Metropolitan statistical area
- Combined statistical area
- New England City and Town Area (NECTA)
- Urban area
- Congressional district (110<sup>th</sup> Congress)
- Public Use Microdata Area (PUMA)

## **DOCUMENT OVERVIEW**

A brief summary of the chapters in the documentation is listed below:

1. [Chapter 1: Abstract](#) contains an overview of the American Community Survey (ACS) and how to use the ACS Summary File technical documentation.
2. [Chapter 2: How to Use the Summary File](#) gives users the background information on the data tables. It also describes the naming conventions on the table names, and it gives a brief summary of the geographies.
3. [Chapter 3: Subject Locator](#) is an index designed to help users quickly identify the tables in the summary file. This index is arranged in alphabetical order by the name of a subject.
4. [Chapter 4: Summary Level Sequence Chart](#) has a detailed list on the geographies and their summary level. The summary level is a three-character code that the ACS uses for identifications on geographies. The summary level is used in the production of the ACS data.
5. [Chapter 5: List of Detailed Tables](#) contains information on the file identification, the table's identification number, title of the table, how many cells are the table, the start position for the table, and the sequence numbers.
6. [Chapter 6: Accuracy of the Data](#) provides data users with a basic understanding of the sample design, estimation methodology, and accuracy of the data.
7. [Chapter 7: User Updates](#) informs data users about corrections, errata, and related information. Users can find unique characteristics, changes, or corrections associated with the data. American Community Survey Notes and Errata, which contain user updates for individual files, are located on <http://www.census.gov/acs/www/UseData/Errata.htm>.

Additional reference materials can be found in the appendices of this document:

- A. [Appendix A](#) contains information on American Community Survey geographic terms and concepts.
- B. [Appendix B](#) links to the subject definitions on the ACS Website.
- C. [Appendix C](#) gives an overview on American Community Survey's collection methods and procedures. Data Collection and Processing Procedures are located in Appendix C.
- D. [Appendix D](#) links to the ACS questionnaire on the website.
- E. [Appendix E](#) links to data products and user assistance.
- F. [Appendix F](#) links to maps of areas published by the 2008 ACS for the "nation", "counties and places", "PUMAs", "Core Based Statistical Areas", and "the 110th Congressional District".
- G. [Appendix G](#) links to ACS code lists for "Ancestry", "Hispanic Origin", "Industry", "Language", "Occupation", "Place of Birth, Migration, and Place of Work", "Race", and "State". Also included is the GQ Code List.
- H. [Appendix H](#) consists of the document "Examples of Standard Error Calculations" which contains examples based on the real data to demonstrate the use of the formulas referenced in the Accuracy of the Data Document in Chapter 7.

- I. [Appendix I](#) links to FTP documentation, including the ReadMe file and sample SAS programs.
- J. Additional User Notes are located in [Appendix J](#).

## **USER UPDATES**

The section on User Updates informs data users about corrections, errata, and related explanatory information. These updates provide information about unique characteristics, changes, or corrections. However, sometimes this information becomes available too late to be reflected in the tables or related documentation. American Community Survey user updates are available on the Census Bureau's Internet site at <http://www.census.gov/acs/www/UseData/Errata.htm>. Users also can register to receive user updates by e-mail by contacting Customer Services Center, Marketing Services Office, U.S. Census Bureau on 301-763-INFO ([webmaster@census.gov](mailto:webmaster@census.gov)).

#### INTRODUCTION

“How to Use the ACS Summary File” is intended to be used as a guide for data users to the American Community Survey (ACS) summary file and the documentation. New users should review this chapter before using the ACS Summary File.

#### DATA FORMAT

All ACS Summary File (ACS-SF) are available in the .zip format, which is a compressed format to reduce the file size. Users can download the .zip files through the File Transfer Protocol (FTP) from the American Community Survey FTP site located at URL: [http://www2.census.gov/acs2008\\_1yr/summaryfile/](http://www2.census.gov/acs2008_1yr/summaryfile/). The ACS-SF will need to be unzipped before they can be read.

The FTP site has 53 directories for the data, which include the United States, the 50 states, District of Columbia, Puerto Rico, and example SAS programs. In each directory, there is a geography file for the selected area, and the .zip files are then organized by the geographic areas. For the user’s convenience, if users want the .zip files for all the geographies under a particular directory, the file all\_<state/dc/pr/us>.zip contains all the files in the directory. This allows the users to save time and not have to download each individual file.

After unzipping the ACS-SF, three ASCII (plain text) files are available, one file for the estimates, one for the margins of error, and one for the standard errors. Each ACS-SF includes detailed tables for all of the geographic areas published in 2008 and a geographic header record file in a fixed field; the geographic header record file's data portion includes a geographic link in the comma-delimited format. For more information

on the files and their purposes refer to the [README](#) file in the main directory on the FTP site on [http://www2.census.gov/acs2008\\_1yr/summaryfile/readme2008.pdf](http://www2.census.gov/acs2008_1yr/summaryfile/readme2008.pdf).

## **FILE NAMING CONVENTIONS**

The .zip file names for all of the files follow a predefined structure. The naming convention will enable a user and/or a computer program to determine the contents of a file from its name. Figures 2.1 and 2.2 displays an overview of the file naming conventions.

ACS SF file naming convention for the data summary file names will be *tyyyyppggssssiterr.zip*:

- *t* = type of data (e=estimate, m=margin of error, s=standard error)
- *yyyy* = reference year for the data, e.g., 2008
- *p* = period covered by the file (1=1-year, 3=3-year, 5=5-year)
- *gg* = geographic area (state or US) covered by the file; 'PR' for the Puerto Rico Community Survey
- *ssss* = file sequence number (valid range is 0001 through 9999)

This sequence number will be used in a manner similar to the approach taken for the SF3. Each sequence number will correspond to a series of detailed tables. Each record of this file will be for a unique geographic area published by the ACS. All the data cells contained in the detailed tables for that geographic area would be on this record. There will be a file for the estimates and a separate one for the standard errors.

- *iter* = '000', placeholder for future values for iteration
- *r* = data revision indicator, only present if needed. 'a', 'b', etc

The ACS-SF file naming convention for the geographic header files will be *tyyyyppgg.txt*:

- *t* = type of data (g= geographic header file)
- *yyyy* = reference year for the data, e.g., 2008
- *p* = period covered by the file (1=1-year, 3=3-year, 5=5-year)
- *gg* = geographic area (state or US) covered by the file; 'PR' for the Puerto Rico Community Survey

**Figure 2.1 Zip File Naming Convention Example**

**Figure 2.2 Geoheader Summary File Naming Convention Example**

## **READING THE GEOGRAPHIC HEADER RECORD**

The geographic header record layout is below (Table 2.1). The information in each summary level column is a guide to the presence or absence of additional geographic information on that specific summary level. In each row of a particular geographic area code, there is a listing of the summary levels that contain the area code. For example, to uniquely identify a county (summary level 050) you need to know the state and county code. There are 9 Brown counties in the U.S. and in order to identify it uniquely you need to know the state.

**Table 2.1 Geographic Header Record Layout for the ACS Summary File**

<b>Data Dictionary Reference Name</b>	<b>Description</b>	<b>Field Size</b>	<b>Starting Position</b>	<b>Geographic Summary Levels For Single-Year Tables</b>
<b>RECORD CODES</b>				
FILEID	Always equal to ACS Summary File identification	6	1	All Summary Levels
STUSAB	State Postal Abbreviation	2	7	All Summary Levels
SUMLEVEL	Summary Level	3	9	All Summary Levels
COMPONENT	Geographic Component	2	12	All Summary Levels
LOGRECNO	Logical Record Number	7	14	All Summary Levels
<b>GEOGRAPHIC AREA CODES</b>				
US	US	1	21	010

SDUNI	School District (Unified)	5	148	970
UR	Urban/Rural	1	153	010, 020, 030, 040
PCI	Principal City Indicator	1	154	312, 352
TAZ	Traffic Analysis Zone	6	155	Reserved for future use
UGA	Urban Growth Area	5	161	Reserved for future use
PUMA5	Public Use Microdata Area – 5% File	5	166	795, 901
PUMA1	Public Use Microdata Area – 1% File	5	171	Reserved for future use
GEOID	Geographic Identifier	40	176	All Summary Levels
NAME	Area Name	200	216	All Summary Levels
RESERVED	For Future needs	50	418	Reserved for future use

**Note:** The Geographic Summary Levels that are designated, as “Reserved for future use” will be used for the ACS period estimate data products. These reference names will not be defined in the ACS Geographic Terms and Concepts section until they are used.

## GEOGRAPHIC HIERARCHY PRIMER

Detailed information on ACS summary levels can be found in Chapter 4. Chapter 4 identifies each geographic level and provides the code for the level. Figure 2.3 provides an example of the various geographic hierarchies used in the American Community Survey. Take some time to review this chart to become familiar with the different hierarchies.

**Figure 2.3 Hierarchy of ACS Geographic Entities**

### Metropolitan/Micropolitan Areas

## **WORKED EXAMPLE**

Let's say you want to create Table B08406, "Sex of workers by means of transportation to work for workplace geography," for the state of Alaska from the files on the ftp site [http://www2.census.gov/acs2008\\_1yr/summaryfile/](http://www2.census.gov/acs2008_1yr/summaryfile/). Which files do you need? How do you read the files?

You will need three files:

1. The data dictionary (merge\_5\_6\_final.xls)
2. The data file (e2008ak0001000.txt)
3. The geography file (g20081ak.txt)

Start with the data dictionary, merge\_5\_6\_final.xls. Under the "Tblid" column, look for the value "B08406". You will see that the "Sequence Number" is "0003." This means that the data you looking for are in the file "e2008ak0003000.txt". How do we know this is the right file? We know this from the name of the file: the "e" stands for estimate, 2008 is the year, "ak" is the state (Alaska), and "0003" is the sequence number (which contains the data for Table B08406). See the "File Naming Conventions" section in Chapter 2.

Then use the geography file for Alaska to determine the location within the state to which the data refer. The appropriate file is g20081ak.txt, where "g" means "geography", 2008 is the year, 1 is the period estimate (in this case, 1-year estimate), and ak is the state. (For each state, the geography file contains the lower-case postal-abbreviation of the state.)

When you open the data file, e20081ak0001000.txt (the data file), you will see the following comma-delimited fields on the first line:

```
ACSSF,2008e1,ak,000,0003,0000001,335039,264535,219908,44627,35706, ...
```

The first six fields – from "ACSSF" to "0000001" – are identifiers.

- A. The first field tells you that this is an ACS Summary File;
- B. The second tells you that these data are one-year estimates for the year 2008 (notice the "e" before "2008" and the "1" at the end);
- C. The third tells you the state ("ak" is Alaska);
- D. The fourth is an iteration number;
- E. The fifth is the all-important sequence number;
- F. The last is a logical record code (LOGRECNO). The LOGRECNO identifies the location within a state.

The geography file, g20081ak.txt, describes the LOGRECNO. Each LOGRECNO specifies a location pertaining to the state. For example, a LOGRECNO of "0000001" means the state of Alaska; a LOGRECNO of "0000002" means just the urban areas in Alaska; a LOGRECNO of "0000003" refers to just rural areas in Alaska. Notice that each state has its own geography file.

The other fields in the data file, from the seventh on, are data values. Each field corresponds to the value of the “line number” variable in the data dictionary. So field number seven (the 335039 value, after the sixth comma) corresponds to line number one, which is “Total”. Field number eight (the 264535 value, after the seventh comma) refers to line number two, which is “Car, Truck, or Van.” Field number nine (the 219908 value) corresponds to line number three, which is “Drove alone.” This continues all the way up to line number 51, at which point Table B08406 ends.

Were you to read this into a computer program using software such as SAS, you could translate the first ten fields of line number one in e20081ak0001000.txt as follows:

File Identification	File Type	State/U.S.- Abbreviation (USPS)	Character Iteration	Sequence Number	Logical Record Number	Total:	Car, truck, or van:	Drove alone	Carpooled:
ACSSF	2008e1	ak	000	0003	0000001	335039	264535	219908	
ACSSF	2008e1	ak	000	0003	0000010	149452	134141	113696	
ACSSF	2008e1	ak	000	0003	0000011	47314	39757	33343	
ACSSF	2008e1	ak	000	0003	0000012	.	.	.	
ACSSF	2008e1	ak	000	0003	0000013	149452	134141	113696	
ACSSF	2008e1	ak	000	0003	0000017	49452	134141	113696	

**Figure 2.4 Linking Geographic Header File to the Data Files**

## **DATA STRUCTURE AND SEGMENTATION**

Each ACS-SF consists of 475 physical files: one geographic header file and 474 data files, of which 158 contain estimates, 158 contain standard errors, and 158 contain margins of error. The larger size of the tables made it necessary to divide the files into smaller segments. Figure 2.5 displays the overview of the contents in an ACS Summary File. Additional information on file/table segmentation can be found in Chapter 5: List of Tables.

A logical unique record number is assigned to all files for a specific geographic entity. This is done so that all records for a specific entity can be linked together across files. Besides the logical record number, other identifying fields are also carried over from the geographic header file to the table files. These are file identification, state/U.S. abbreviation, and characteristic. For SAS users, a SAS program for importing the data files is provided in the main directory of the ACS-Summary File's FTP site on: [http://www2.census.gov/acs2008\\_1yr/summaryfile/](http://www2.census.gov/acs2008_1yr/summaryfile/)

**Figure 2.5 Contents in an ACS Summary File Overview**

**INTRODUCTION**

Subject Locator lists tables by subject alphabetically. Users can look up a subject to see a list of tables that are associated with a particular topic. This is useful as a quick reference to the data tables that are available from the American Community Survey, which is located on the following URL: [http://www.census.gov/acs/www/Products/users\\_guide/](http://www.census.gov/acs/www/Products/users_guide/). In addition, by clicking on the link of the table title below, users will see a table shell for the table; a table shell shows the line numbers and the stub without the actual data.

**TABLE BY SUBJECT**

<b>TABLES BY SUBJECT</b>	<b>Table ID</b>	<b>Release Date</b>
<b>Age of Householder</b>

### **Accuracy of the Data**

---

The accuracy of the data document, located on:  
<http://www.census.gov/acs/www/UseData/Accuracy/Accuracy1.htm>,  
documents provides data users with a basic understanding of the sample design,  
confidentiality, sampling error, nonsampling error, estimation methodology, and accuracy  
of the data.

## **Chapter 7**

### **User Updates**

---

Any updates made to the data due to found error are displayed in Errata section of the ACS website located on: <http://www.census.gov/acs/www/UseData/Errata.htm>.

## Appendix A

### ACS Geographic Terms and Concepts

---

*The Geographic Terms and Concepts used in the American Community Survey are the same as other Census Bureau products with the exception of those listed below. See the Census 2000 Geographic Terms and Concepts [PDF] at <http://www.census.gov/geo/www/tiger/glossry2.pdf> or the Geographic Areas Reference Manual (GARM – vintage 1990) at <http://www.census.gov/geo/www/garm.html> for definitions of other geographic terms and concepts. The ACS is conducted in the United States and Puerto Rico. In Puerto Rico, the survey is known as the Puerto Rico Community Survey or PRCS.*

**Combined New England City and Town Area (CNECTA)** – Adjacent New England City and Town Areas (see glossary term New England City and Town Area) that have a high degree of employment interchange may be combined to form Combined New England City and Town Areas (or CNECTAs). New England City and Town Areas that are part of a CNECTA retain their separate identities.

**Combined Statistical Area (CSA)** – Defined by the federal Office of Management and Budget for use by federal statistical agencies according to the Census data, adjacent metropolitan and micropolitan statistical areas may be combined to form a CSA if the areas have a high degree of employment interchange. Each metropolitan or micropolitan statistical area retains its own identity.

**Core Based Statistical Area (CBSA)** – Core Based Statistical Area is a collective term for both metropolitan and micropolitan areas.

**Metropolitan Division** – A metropolitan statistical area with population greater than 2.5 million may be divided into smaller groups known as metropolitan divisions.

**Metropolitan Statistical Area/Micropolitan Statistical Area** – Metropolitan and micropolitan statistical areas (metro and micro areas) are geographic entities defined by the U.S. Office of Management and Budget for use by Federal statistical agencies in collecting, tabulating, and publishing Federal statistics. A metro area contains a core urban area of 50,000 or more population, and a micro area contains an urban core of at least 10,000 (but less than 50,000) population. Each metro or micro area consists of one or more counties and includes the counties containing the core urban area, as well as any adjacent counties that have a high degree of social and economic integration (as measured by commuting to work) with the urban core.

**New England City and Town Area (NECTA)** – is a geographic entity defined by the U.S. Office of Management and Budget for use by Federal statistical agencies in describing aspects of the New England region in the United States. NECTA is based on the concept of a core area with a large population nucleus, plus adjacent communities having a high degree of economic and social integration with that core. Similar to the metropolitan and micropolitan statistical areas, a metropolitan NECTA has an urban core

of at least 50,000 population, while a micropolitan NECTA has an urban core of at least 10,000 inhabitants but less than 50,000.

**New England City and Town Area (NECTA) Division** – A New England City and Town Area with population greater than 2.5 million may be divided into smaller groups known as NECTA Divisions.

**State Designated Tribal Statistical Area (SDTSA)** – Statistical entities for state recognized American Indian tribes that do not have a state recognized land base (reservation). SDTSAs are identified and delineated for the U.S. Census Bureau by a state liaison identified by the governor's office in each state. Formerly known as State Designated American Indian Statistical Area (SDAISA).

## **Appendix B**

### **Subject Definitions**

---

To better understand the results of the American Community Survey, 53 population variables, and 42 housing variables have identified and defined in the Subject Definitions document, located on <http://www.census.gov/acs/www/UseData/Def.htm>. This document includes information on how the data were collected and how they are presented in data products.

## Appendix C

### Data Collection and Processing Procedures

---

The American Community Survey is conducted using three methods of data collection to contact households:

- Mail: Self-enumeration through mail-out/mail-back
- Telephone: Computer Assisted Telephone Interviewing (CATI)
- Personal Visits: Computer Assisted Personal Interviewing (CAPI)

**Self-enumeration through mail-out/mail-back methodology** -- The self-enumeration procedure uses several mailing pieces:

- a prenotice letter
  - the American Community Survey questionnaire
  - a reminder card
  - and a replacement questionnaire if the original questionnaire is not returned in a timely manner
- Sample Addresses that do not respond by mail may be contacted using the follow-up procedures CATI, CAPI, or both

**Computer Assisted Telephone Interviewing (CATI)**-- The CATI operation is conducted approximately six weeks after the American Community Survey questionnaire is mailed. We will attempt to obtain telephone numbers and conduct telephone interviews for all households that have not responded by mail during the six-week period. Census Bureau telephone interviewing staff will conduct these interviews.

**Computer Assisted Personal Interviewing (CAPI)**-- Following the CATI operation, a sample will be taken from the addresses that remain uninterviewed. These addresses are visited by Census Bureau field representatives, who will conduct personal interviews.

A detailed description of the data collection and processing procedures can be found in the [ACS Design and Methodology Technical Paper](http://www.census.gov/acs/www/Downloads/tp67.pdf) located on: <http://www.census.gov/acs/www/Downloads/tp67.pdf>.

## **Appendix D**

### **Questionnaire**

---

Examples of the questionnaires forms that were sent to sample addresses can be found in the questionnaires section of the ACS website located on:

<http://www.census.gov/acs/www/SBasics/SQuest/SQuest1.htm>.

## **Appendix E**

### **Data Products and User Assistance**

---

The following documentation is provided to give users additional information on the ACS data products and to provide user assistance.

A guide to the ACS data products on the American FactFinder Website is located on: [http://factfinder.census.gov/home/saff/aff\\_acs2008\\_quickguide.pdf](http://factfinder.census.gov/home/saff/aff_acs2008_quickguide.pdf)

An overview of the changes in the data products since the 2007 ACS, including new products, is available on:

<http://www.census.gov/acs/www/Products/2008/prodchanges.html>

Details on 2008 data products availability are available on:

<http://www.census.gov/acs/www/Products/2008/schedule.html>

Guidance on making data comparisons between the 2008 ACS, 2007 ACS, and Census 2000 is available on: <http://www.census.gov/acs/www/UseData/compACS.htm>

## **Appendix F**

### **Maps**

---

Detailed information about the ACS maps can be found in the reference maps section of the ACS website located on

[http://www.census.gov/acs/www/Products/users\\_guide/acs\\_2008\\_reference\\_maps.htm](http://www.census.gov/acs/www/Products/users_guide/acs_2008_reference_maps.htm).

## Appendix G

### Code Lists

---

The ACS code lists located on [http://www2.census.gov/acs2008\\_1yr/summaryfile/Append\\_G\\_2008\\_Code\\_List.pdf](http://www2.census.gov/acs2008_1yr/summaryfile/Append_G_2008_Code_List.pdf) are provided as reference for the following characteristics: “Ancestry”, “Hispanic Origin”, “Industry”, “Language”, “Occupation”, “Place of Birth, Migration, and Place of Work”, “Race”, and “State”.

Click here to view the ACS Group Quarters Type Codes and Definitions:  
[http://www.census.gov/acs/www/Downloads/2008\\_ACS\\_GQ\\_Definitions.pdf](http://www.census.gov/acs/www/Downloads/2008_ACS_GQ_Definitions.pdf).

## Appendix H

### Examples of Standard Error Calculations

---

We will present some examples based on the real data to demonstrate the use of the formulas.

#### Example 1 - Calculating the Standard Error from the Confidence Interval

The estimated number of males, never married is 41,011,718 from summary table B12001 for the United States for 2008. The margin of error is 93,906.

$$\text{Standard Error} = \text{Margin of Error} / 1.645$$

Calculating the standard error using the margin of error, we have:

$$SE(41,011,718) = 93,906 / 1.645 = 57,086.$$

#### Example 2 - Calculating the Standard Error of a Sum

We are interested in the number of people who have never been married. From Example 1, we know the number of males, never married is 41,011,718. From summary table B12001 we have the number of females, never married is 34,893,327 with a margin of error of 81,141. So, the estimated number of people who have never been married is  $41,011,718 + 34,893,327 = 75,905,045$ . To calculate the standard error of this sum, we need the standard errors of the two estimates in the sum. We have the standard error for the number of males never married from example 1 as 57,086. The standard error for the number of females never married is calculated using the margin of error:

$$SE(34,893,327) = 81,141 / 1.645 = 49,326.$$

So using the formula for the standard error of a sum or difference we have:

$$SE(75,905,045) = \sqrt{57,086^2 + 49,326^2} = 75,444$$

Caution: This method, however, will underestimate (overestimate) the standard error if the two items in a sum are highly positively (negatively) correlated or if the two items in a difference are highly negatively (positively) correlated.

To calculate the lower and upper bounds of the 90 percent confidence interval around 75,905,045 using the standard error, simply multiply 75,444 by 1.645, then add and subtract the product from 75,905,045. Thus the 90 percent confidence interval for this estimate is  $[75,905,045 - 1.645(75,444)]$  to  $[75,905,045 + 1.645(75,444)]$  or 75,780,940 to 76,029,150.

### Example 3 - Calculating the Standard Error of a Percent

We are interested in the percentage of females who have never been married to the number of people who have never been married. The number of females, never married is 34,893,327 and the number of people who have never been married is 75,905,045. To calculate the standard error of this sum, we need the standard errors of the two estimates in the sum. We have the standard error for the number of females never married from example 2 as 49,326 and the standard error for the number of people never married calculated from example 2 as 75,444.

The estimate is  $(34,893,327 / 75,905,045) * 100\% = 45.97\%$

So, using the formula for the standard error of a proportion or percent, we have:

$$SE(45.97\%) = 100\% * \left( \frac{1}{75,905,045} \sqrt{49,326^2 - 0.4597^2 * 75,444^2} \right) = 0.05\%$$

To calculate the lower and upper bounds of the 90 percent confidence interval around 45.97 using the standard error, simply multiply 0.05 by 1.645, then add and subtract the product from 45.97. Thus the 90 percent confidence interval for this estimate is [45.97 - 1.645(0.05)] to [45.97 + 1.645(0.05)], or 45.89% to 46.05%.

### Example 4 - Calculating the Standard Error of a Ratio

Now, let us calculate the estimate of the ratio of the number of unmarried males to the number of unmarried females and its standard error. From the above examples, the estimate for the number of unmarried men is 41,011,718 with a standard error of 57,086, and the estimates for the number of unmarried women is 34,893,327 with a standard error of 49,326.

The estimate of the ratio is  $41,011,718 / 34,893,327 = 1.175$ .

The standard error of this ratio is

$$SE(1.175) = \frac{1}{34,893,327} \sqrt{57,086^2 + 1.175^2 * 49,326^2} = 0.00233$$

The 90 percent margin of error for this estimate would be 0.00233 multiplied by 1.645, or about 0.004. The 90 percent lower and upper 90 percent confidence bounds would then be [1.175 - 0.004] to [1.175 + 0.004], or 1.171 and 1.179.

### Example 5 - Calculating the Standard Error of a Product

We are interested in the number of 1-unit detached owner-occupied housing units. The number of owner-occupied housing units is 75,373,053 with a margin of error of 224,087 from subject table S2504 for 2008, and the percent of 1-unit detached owner-occupied housing units is 81.8% (0.818) with a margin of error of 0.1 (0.001). So the number of 1-unit detached owner-occupied housing units is  $75,373,053 * 0.818 = 61,655,157$ . Calculating the standard error for the estimates using the margin of error we have:

$$SE(75,373,053) = 224,087 / 1.645 = 136,223$$

and

$$SE(0.818) = 0.001 / 1.645 = 0.0006079$$

The standard error for number of 1-unit detached owner-occupied housing units is calculated using the formula for products as:

$$SE(61,655,157) = \sqrt{75,373,053^2 * .0006079^2 + 0.818^2 * 136,223^2} = 120,483$$

To calculate the lower and upper bounds of the 90 percent confidence interval around 61,655,157 using the standard error, simply multiply 120,483 by 1.645, then add and subtract the product from 61,655,157. Thus the 90 percent confidence interval for this estimate is  $[61,655,157 - 1.645(120,483)]$  to  $[61,655,157 + 1.645(120,483)]$  or 61,456,962 to 61,853,352.

Users should be cautioned that all methods in this section are approximations. They may be overestimates or underestimates of the estimate's standard error, and may not match direct calculations of standard errors or calculations obtained through other methods.

For more detailed information on the calculations of standard errors and the reasoning for the formulas please reference the Accuracy of the Data Document located on the following URL: <http://www.census.gov/acs/www/UseData/Accuracy/Accuracy1.htm>

## Appendix I

### Sample SAS Programs

---

Sample SAS programs (located on: [http://www2.census.gov/acs2008\\_1yr/summaryfile/0SASExamplePrograms/](http://www2.census.gov/acs2008_1yr/summaryfile/0SASExamplePrograms/)) are provided for users to demonstrate how to read and merge the geographic header file, estimate, margin of error, and standard error data files.

SAS Readme file:

**SASReadme.pdf**

Sample SAS Programs:

**ACSsfGeo.sas**

**eak\_0001.sas**

**mak\_0001.sas**

**sak\_0001.sas**

**SASCODE.zip** - Contains 22,000+ SAS programs, one for each summary file, which can be used to convert each summary file into a SAS Dataset, which include table stubs

Here is an example of how to access the three different types of Summary File estimates for one table for all geographies from the ACS summary file.

It is recommended that you review this document before using this SAS program below.

[http://www2.census.gov/acs2007\\_1yr/summaryfile/ACS\\_SF\\_2007\\_Worked\\_Example-advanced.pdf](http://www2.census.gov/acs2007_1yr/summaryfile/ACS_SF_2007_Worked_Example-advanced.pdf)

Detailed example SAS program containing SAS macros:

[http://www2.census.gov/acs2007\\_1yr/summaryfile/0SASExamplePrograms/summary\\_file\\_example\\_macros.sas](http://www2.census.gov/acs2007_1yr/summaryfile/0SASExamplePrograms/summary_file_example_macros.sas)

## Appendix J

### User Notes

---

#### 1) Jam Values

Some data values represent unique situations where either: a) the information to be conveyed is an explanation for the absence of data, represented by a symbol in the data display, such as "(X)", or b) the information to be conveyed is an open-ended distribution, such as 115 or greater, represented by 115+.

Following are the special data values (and their meaning) for case (b), which can appear in any 2008 ACS Detailed Tables containing an open-ended distribution:

Table ID	Low Value	Jam Value Definition	High Value	Jam Value Definition
B01002	0	1-	116	115+
B01002A	0	1-	116	115+
B01002B	0	1-	116	115+
B01002C	0	1-	116	115+
B01002D	0	1-	116	115+
B01002E	0	1-	116	115+
B01002F	0	1-	116	115+

The following are the special data values (and their meaning), which can appear in the 2008 ACS Summary File table as an explanation for the absence of data:

**Missing Value** = “.”: A dot “.”, indicates that the estimate is unavailable. All ACS tables contain these values when estimates are missing due to certain special conditions.

**Filtered Value or Geographic Restriction** = “ “: A blank indicates that a value is filtered or is not shown due to a geographic restriction.

**Margin of Error (MOE) or Standard Error (SE) = 0:** Estimate is controlled, which indicates the estimates are controlled and a statistical test is not appropriate.

## 2) Rounding Rules, Margin of Errors (MOE), and Standard Errors (SE)

**A.** B00001, B00002, B98001, and B98002 are sample counts, not estimates, and do not have MOE’s and SE’s associated with them. Tables in series B99\* imputation tables and B98\* quality measure tables (except B98001 and B98002) do not have MOEs calculated for them. The MOE and SE are set to -1 for these tables.

**B.** There are a few special rules on how certain margin of error and standard error are determined for ACS estimates. The accuracy of the estimate (decimal place) in the base tables to determine how many digits the standard error should be rounded.

The only exceptions to these rules are tables B19082: SHARES OF AGGREGATE HOUSEHOLD INCOME BY QUINTILE and B19083: GINI INDEX OF INCOME INEQUALITY. On American FactFinder (AFF), the estimates display to 2 decimal places and the MOE to 3.

## 3) Display of Estimates

**Display of whole numbers in the summary files:** The estimates in the summary files are stored using standard notation instead of in scientific notation. The largest estimate in the 2008 Summary File contains 14 digits, because since SAS was used to generate the 2008 Summary File, SAS automatically stores and displays values with more than 12 digits using scientific notation, but these values were stored in the summary files as whole numbers.

**Display of decimal values in the summary files:** The following median and ratio tables are displayed as decimals. The following list shows these tables, their table types, and accuracy.

<b>Table ID</b>	<b>Table Title</b>	<b>Table Type</b>	<b>Accuracy</b>
B01002	MEDIAN AGE BY SEX	MEDIAN	Tenths
B01002A	MEDIAN AGE BY SEX (WHITE ALONE)	MEDIAN	Tenths
B01002B	MEDIAN AGE BY SEX (BLACK OR AFRICAN AMERICAN ALONE)	MEDIAN	Tenths
B01002C	MEDIAN AGE BY SEX (AMERICAN INDIAN AND ALASKA NATIVE)	MEDIAN	Tenths
B01002D	MEDIAN AGE BY SEX (ASIAN ALONE)	MEDIAN	Tenths
B01002E	MEDIAN AGE BY SEX (NATIVE HAWAIIAN AND OTHER PACIFIC ISLANDER ALONE)	MEDIAN	Tenths
B01002F	MEDIAN AGE BY SEX (SOME OTHER RACE ALONE)	MEDIAN	Tenths
B01002G	MEDIAN AGE BY SEX (TWO OR MORE RACES)	MEDIAN	Tenths
B01002H	MEDIAN AGE BY SEX (WHITE ALONE, NOT HISPANIC OR LATINO)	MEDIAN	Tenths
B01002I	MEDIAN AGE BY SEX (HISPANIC OR LATINO)	MEDIAN	Tenths
B05004	MEDIAN AGE BY CITIZENSHIP STATUS BY SEX	MEDIAN	Tenths
B06002	MEDIAN AGE BY PLACE OF BIRTH IN THE UNITED STATES	MEDIAN	Tenths
B06002PR	MEDIAN AGE BY PLACE OF BIRTH IN PUERTO RICO	MEDIAN	Tenths
B07002	MEDIAN AGE BY RESIDENCE 1 YEAR AGO IN THE UNITED STATES	MEDIAN	Tenths
B07002PR	MEDIAN AGE BY RESIDENCE 1 YEAR AGO IN PUERTO RICO	MEDIAN	Tenths
B08103	MEDIAN AGE BY MEANS OF TRANSPORTATION TO WORK	MEDIAN	Tenths
B08503	MEDIAN AGE BY MEANS OF TRANSPORTATION TO WORK FOR WORKPLACE GEOGRAPHY	MEDIAN	Tenths
B12008	MEDIAN AGE AT FIRST MARRIAGE	MEDIAN	Tenths
B12008A	MEDIAN AGE AT FIRST MARRIAGE (WHITE ALONE)	MEDIAN	Tenths
B12008B	MEDIAN AGE AT FIRST MARRIAGE (BLACK OR AFRICAN AMERICAN ALONE)	MEDIAN	Tenths
B12008C	MEDIAN AGE AT FIRST MARRIAGE (AMERICAN INDIAN AND ALASKA NATIVE ALONE)	MEDIAN	Tenths
B12008D	MEDIAN AGE AT FIRST MARRIAGE (ASIAN ALONE)	MEDIAN	Tenths
B12008E	MEDIAN AGE AT FIRST MARRIAGE (NATIVE HAWAIIAN AND OTHER PACIFIC ISLANDER ALONE)	MEDIAN	Tenths
B12008F	MEDIAN AGE AT FIRST MARRIAGE (SOME OTHER RACE ALONE)	MEDIAN	Tenths
B12008G	MEDIAN AGE AT FIRST MARRIAGE (TWO OR MORE RACES)	MEDIAN	Tenths
B12008H	MEDIAN AGE AT FIRST MARRIAGE (WHITE ALONE, NOT HISPANIC OR LATINO)	MEDIAN	Tenths
B12008I	MEDIAN AGE AT FIRST MARRIAGE (HISPANIC OR LATINO)	MEDIAN	Tenths
B19082	SHARES OF AGGREGATE HOUSEHOLD INCOME BY QUINTILE	GINI	Tenths
B19083	GINI INDEX OF INCOME INEQUALITY	GINI	Thousandths
B23013	MEDIAN AGE BY SEX FOR WORKERS 16 TO 64 YEARS	MEDIAN	Tenths
B23020	MEAN USUAL HOURS WORKED IN THE PAST 12 MONTHS FOR WORKERS 16 TO 64 YEARS	RATIO	Tenths
B23021	MEAN WEEKS WORKED IN THE PAST 12 MONTHS FOR WORKERS 16 TO 64 YEARS	RATIO	Tenths

Table ID	Table Title	Table Type	Accuracy
B25010	AVERAGE HOUSEHOLD SIZE OF OCCUPIED HOUSING UNITS BY TENURE	RATIO	Hundredths
B25018	MEDIAN NUMBER OF ROOMS	MEDIAN	Tenths
B25021	MEDIAN NUMBER OF ROOMS BY TENURE	MEDIAN	Tenths
B25071	MEDIAN GROSS RENT AS A PERCENTAGE OF HOUSEHOLD INCOME IN THE PAST 12 MONTHS (DOLLARS)	MEDIAN	Tenths
B25092	MEDIAN SELECTED MONTHLY OWNER COSTS AS A PERCENTAGE OF HOUSEHOLD INCOME IN THE PAST 12 MONTHS	MEDIAN	Tenths

#### 4) Special Table ID Sequence Rules

The data from the American Community Survey contains 75 detailed tables that have different table layouts for the Puerto Rico than their United States counterparts. The United States version of the tables are limited to geographic areas in the US (50 states plus the District of Columbia) while the Puerto Rico versions are limited to areas in Puerto Rico. In the summary file the Puerto Rico version of the tables are in sequence file 149 through 158. Therefore, for all geographic areas within the US sequence files 149 through 158 will be blank. In addition, sequence files 1,2,23,24, 28-32, and 147 will be blank for Puerto Rico as they contain the US version of the tables. The decision to separate the files was made because the comparable tables between the US and Puerto Rico may have a different number of cells (such as C06001 with 45 cells and C06001PR with 37 cells) which would significantly alter the metadata between the US and Puerto Rico. To identify what tables are available for Puerto Rico only look for the "PR" suffix in the table id (e.g. C06001PR).

For more information on PR only sequences that are counterparts to states-only sequences, please reference the following table.

US/State-only Sequences	PR Only Sequences
1 (US)	149 (PR)
2 (US)	150 (PR)
23 (US)	151 (PR)
24 (US)	152 (PR)
28 (US)	153 (PR)
29 (US)	154 (PR)
30 (US)	155 (PR)
31 (US)	156 (PR)
32 (US)	157 (PR)
147 (US)	158 (PR)

Sequences 51 and 146 contain many geo-restricted tables. Sequences 125-133 contain 3 large median tables with 499 cells. Due to the size restriction on the sequences (no more than 245 cells), each of the tables had to be broken into 3 sequences. So for example, sequence 125 contains B24121 cells 1-167, sequence 126 contains B24121 cells 168-333; sequence 127 contains B24121 cells 334-499, etc.

## 5) ACS User Notes

ACS User Notes are available on:

<http://www.census.gov/acs/www/UseData/usernotes.html>

## 6) Detailed Table Geographic Restrictions

ACS 2008 base tables that were subject to geographic restrictions are located on:

[http://www.census.gov/acs/www/Products/users\\_guide/ACS2008\\_Data\\_Product\\_Geographic\\_Restriction.xls](http://www.census.gov/acs/www/Products/users_guide/ACS2008_Data_Product_Geographic_Restriction.xls)

## 7) Data Release Filtering Rules

**Data release filtering rules.** Filtering rules, based on the statistical reliability of the survey estimates, are used because certain geographic areas contain very detailed tables might include estimates whose reliability is unacceptable. The main data release rule for the ACS tables works as follows. Every base table consists of a series of estimates. If more than half the estimates are not statistically different from 0 (at a 90 percent confidence level), then the table fails. Each estimate is subject to sampling variability that can be summarized by its standard error. Dividing the standard error by the estimate yields the coefficient of variation (CV) for each of the estimates. (If the estimate is 0, a CV of 100 percent is assigned.) To implement this requirement for each table at a given geographic area, CVs are calculated for each of the table's estimates, and the median CV value is determined. If the median CV value for the table is less than or equal to 61 percent, the table passes for that geographic area; if it is greater than 61 percent, the table fails. Tables that are too sparse will fail this test. In that case, the table will not be published for that geographic area. Whenever a table fails, a simpler table that collapses some of the detailed lines together can be substituted for the original, more detailed table. The rules are then applied to the simpler table. If it passes, the simpler table is released. If it fails, none of the estimates for that particular table is released for this geographic area. These rules are applied to single-year period estimates and multi-year period estimates based on three years of sample data.

For a complete list of filtered detailed tables, please reference the following file:

[http://www2.census.gov/acs2008\\_1yr/filter\\_helper\\_file.txt](http://www2.census.gov/acs2008_1yr/filter_helper_file.txt)
