---

* Same-sex couple households are included in the family households category if there is at least one additional person related to the household by birth or adoption. Same-sex couple households with no relatives of the household present are tabulated in nonfamily households. Nonfamily households consist of people living alone and households which do not have any members related to the householder. Nonrelatives include any household member not related to the householder by birth, marriage, or adoption. This includes unmarried partners. Responses of "same-sex spouse" were edited during processing to "unmarried partner."
