25 Million Reasons to be Proud of Texas (among a few more)

Demographic Highlights

TEXAS is:

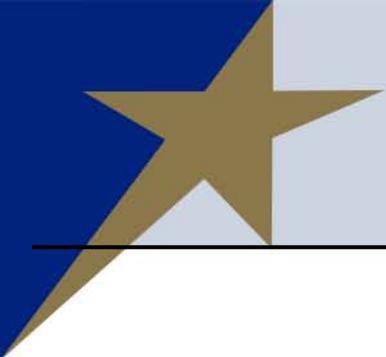

- big.** The population of Texas is the second largest in the United States, approaching 25 million people (estimated population of 24.8 million people in 2009).⁷
- young.** Approximately 28% of Texas' population is under 18 and only 10% of the population is older than 65 years.¹ Webb County in Texas, has the youngest population in the U.S. with children younger than 5 comprising 12.8% of the population.⁷
- embracing of culture and diversity.** Approximately 9 million or 38% of Texans are of Hispanic descent, 2.8 million or 12% are African Americans, and 1 million or 4% are other (non-Anglo mainly of Asian descent).¹ In about a decade, it is expected that Texas' population will have more persons of Hispanic descent than any other racial or ethnic group.⁴
- a desired place to live and work.** Net in-migration to Texas accounts for almost half of the population growth in recent years.¹ More than 171,900 college graduates moved into Texas each year between 2006 and 2008, placing Texas as 2nd in the Nation by this measure.
- urban.** Texas has three of the top 10 largest cities in the Nation.³ Several of the metropolitan areas in Texas are among the most rapidly growing in the Nation.⁵
- rural.** Texas is the second largest state in the Nation in terms of square miles (268,601) and approximately 17% of the population lives in rural areas.¹
- a working state.** Texas has a civilian labor force of more than twelve million workers and an unemployment rate lower than in most States.⁶
- family oriented.** Texas ranks 3rd among states for the percent of households which are married-couple families with children (24.4%).²
- multigenerational.** Texas ranks 3rd among states for percent of households which are multigenerational (4.5%).²
- growing – fast.** Texas gained more population than any other state in the last estimate year (between July 1, 2008 and July 1, 2009), adding 478,000 people.⁷ Among cities over 100,000 population in the U.S., 4 of the 10 fastest growing areas are in Texas (2007-2008 change).⁷

Major Points

- Texas' population will continue to grow, driven by both natural increase and net migration (internal and international)
- The Hispanic origin population contributes substantially to overall growth of Texas' population
- The population will continue to increase in major urbanized areas and along the south Texas border, with declining population in most rural areas.
- The Coastal Bend region has been generally experienced net out migration over the past decade and is projected to experience a slight population decline in the coming years.
